OPTI's Mission & Vision

The HEARTland Network consists of a consortium of accredited health care facilities, organizations and Des Moines University College of Osteopathic Medicine which exists to:

• Promote excellence in education and training for osteopathic medical students, interns and residents to meet tomorrow’s health care needs for Iowans as well as the nation.

• Contribute to the advancement of knowledge through the fostering of research.

• Promote innovation, creativity and excellence along the continuum of osteopathic medical education.

The HEARTland Network OPTI adds value to medical training by assuring the osteopathic concepts of holism, wellness and prevention, care for patients’ individual health needs, environment and ability to access quality health care.

OPTI Strategic Objectives

Faculty and Resident Development

- Individual program needs assessment.

- Creation of program specific development opportunities.

- Four development opportunities offered each year.

Research

Support clinical research and scholarly activity of Network members by providing opportunities and assistance for:

- Resident research projects

- Presentation and/or publication of resident research projects

- Mini-Grants to offset incurred with resident research and/or research presentations.

Osteopathic Principles & Osteopathic Manipulative Treatment (OMT)

OPP Curriculum integration:

- Workshops conducted by University Faculty, including hands-on practice and principles and practice didactics.

New Program Development
Supported and assisted with Osteopathic Recognition with three HEARTland Network residency programs (approved).

Assisted with the development and application for Osteopathic Recognition with two residency programs, waiting for approval.
